

ArtiKool is only available through certified service technicians who follow Imagines' Performance Protocol Program. Once installed, expect to see a drop in your air temperature of 3°-5° within the first hour of operation and maximum benefit within 1,000 miles of operation. Some vehicles have reported air temperature drops of as much as 20°.

ArtiKool is not a refrigerant or an oil and will not replace either in your air-conditioning system.

ArtiKool

COOL YOUR
CAR'S INTERIOR
FAST

The ArtiKool Automotive Solution is an excellent way to experience the benefits of ArtiKool technology. If you've ever gone through a summer in our southwest deserts, you know first hand how uncomfortable your car's interior can become after just sitting for thirty minutes in the sun. Some automobiles have excellent air-conditioning systems but even these systems lose effectiveness over time. The Reason...OIL FOULING. It occurs gradually and causes your air conditioning system to lose efficiency and its ability to cool. Once installed, ArtiKool restores efficiency and comfort to better-than-new-condition. ArtiKool provides:

- COLDER AIR
- DRIER AIR
- FASTER COOLING
- IMPROVED LUBRICATION
- REDUCED MAINTENANCE
- QUIETER OPERATION
- LONGER EQUIPMENT LIFE

ArtiKool is an air-conditioning supplement, made in the USA, that delivers amazing results. ArtiKool is manufactured to ISO standards and when installed by certified service technicians following Imagines' Performance Protocol Program, is a once-in-a-lifetime treatment. ArtiKool is comprised of a microscopic blend of specialty compounds and synthetic oils making it compatible with all makes and models, including older R12 systems.

So Beat the Heat... with ArtiKool

Enjoy the pleasure of driving again
and be as "cool as a cucumber".

ARTIKOOL IS NON-TOXIC AND
NON-CORROSHIVE AND CONTAINS
NO HARMFUL CHEMICALS OR
COMPOUNDS WHATSOEVER.

ARTIKOOL WILL NOT REPAIR A
DAMAGED SYSTEM AND CAN BE
ONLY ADDED TO A SYSTEM THAT IS
WORKING PROPERLY.
